

SANJAY DHAKAR

Pre-Final year AI & Data Science student building AI/ML and GenAI applications with expertise in NLP, FastAPI, RAG, vector databases, and scalable deployment.

Email: sanjaydhakar050@gmail.com | Contact: +91 6376517182 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

EDUCATION

MBM University | Jodhpur

August 2023 - June 2027

B.E. in Artificial Intelligence and Data Science

CGPA: 8.26

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, OS, AI&ML, Deep learning

TECHNICAL SKILLS

Languages: C++, Python, MySQL

Frameworks and Libraries: FastAPI, Streamlit, HuggingFace Transformers, ChromaDB, FAISS, PyTorch, Scikit-learn, NumPy, Pandas, React, Tailwind CSS

Tools and Platforms: Git/GitHub, Jupyter Notebook, Docker, Render, Vercel

Problem Solving & CS Fundamentals: DSA, Algorithms, OOP, SQL, Operating Systems, Statistics

EXPERIENCE

Infosys SpringBoard

September 2025 - November 2025

AI/ML Intern

[\[Live\]](#)

[FastAPI](#) | [React](#) | [Scikit-learn](#) | [Google Gemini AI](#) | [Vercel](#) | [Render](#)

CyberShield: AI-Powered Cybersecurity Threat Intelligence Platform

- Built and deployed a full-stack AI-powered cybersecurity platform using FastAPI, React, and Scikit-learn, achieving **97.1% malware classification accuracy** on the CICIDS2017 dataset.
- Engineered a **malware analysis pipeline** with entropy analysis, YARA rules, PE parsing, and anomaly detection for real-time threat intelligence.
- Integrated **Google Gemini AI** for security consultation and automated **PDF reporting**.
- deployed production-ready app on **Render (backend)** and **Vercel (frontend)**

PROJECTS

DocMind AI – Document Intelligence Platform

[\[Github\]](#)

[FastAPI](#) | [ChromaDB](#) | [Hugging Face Transformers](#) | [Streamlit](#) | [Python](#)

- Developed a comprehensive offline PDF intelligence system across **3 domains (Medical, Indian Legal, and Resume)** with **no external API dependencies**.
- Engineered **map-reduce summarization pipeline** (flan-t5-base) with domain-specific prompts, inference caching, and token-aware truncation.
- Implemented extractive **RAG Q&A** using roberta-base-squad2 with **ChromaDB vector retrieval**, real confidence scores, and page-level citations.
- Designed **per-domain isolated ChromaDB** collections with cosine similarity and async FastAPI endpoints using **asyncio.to_thread**.
- Wrote **65 pytest** unit tests with mocked pipelines

Sentinel AI – Real-Time RAG Fact-Checking Engine

[\[Github\]](#)

[FastAPI](#) | [Llama 3 \(Ollama\)](#) | [FAISS](#) | [Streamlit](#) | [GNews API](#)

- Built **100% locally hosted** misinformation detection system using **Llama3-8B via Ollama with zero API costs** and no data leakage.
- Engineered **live web RAG pipeline** - real-time GNews retrieval + FAISS vector search with all-mpnet-base-v2 to extract semantically relevant evidence.
- Designed two-stage LLM reasoning - **separate claim extraction and NLI verification** agents with temporal logic prompting for time-sensitive claims.
- Built decoupled **microservice architecture (FastAPI+Streamlit)** with confidence scores and direct source citations in the UI.

CERTIFICATIONS & ACHIEVEMENTS

- OCI 2025 **AI Foundations Associate** - Oracle
- OCI 2025 **Generative AI Professional** - Oracle
- Solved **200+ DSA problems** across platforms like LeetCode and GeeksforGeeks.
- Finished Kaggle specializations in **ML, Pandas, and Data Visualization**
